## Mines and Mining Stocks

# TUNGSTEN ORE

Deeper Tunnel in Osceola Mine Considerable Good Buying, but Merger Will Doubtless Be Ef-Opens Richest Ore Yet Found.

Opening of the tungsten mines near Os-

and high grade tool steel.

An open air compressor is being installed on the ground, which will make possible much more rapid progress in driving the new tunnel, for the ledge matter is the hardest kind of white quartz, making it difficult to drill by hand. The ledge is between two granite walls and is clearly defined for nearly a mile up the mountainside, near the top of which it is covered with quartzite slide rock.

When the tunne! shall have been diriver one mile its face will be between 4,000 and 5,000 feet vertically from the surface

Great Possibilities in Mine of Salt Lakers Near the New Gold Camp.

Copper Acres Mining company, which has an unusual surface copper showing in its property, about ten miles north of the new high grade gold camp of Bannock, Nev.. could at this time make shipments of pay ore from its dump, is the ments of pay ore from its dump, is the belief of R. A. Margetts, who has for time been in charge of the com-

pany's work. is about 40 feet wide at the surface, in which is found streaks of high-grade ore in places several feet thick. The company was arranging to start shipping when the panic came and the long drop in the price of metals caused cessation of active operations. Since that time little

active operations. Since that time little more than work required to hold the large group of claims has been performed, but recent careful examination of the ore on the dump has convinced Mr. Margetts that a great deal of it could be shipped to the smelter at a profit.

It is not uncommon, he says, to find in the accumulated ore boulders weighing 100 pounds and more which show values of 20 per cent copper and 30 ounces in silver to the ton. And he believes that relatively little new development would be required to place the property upon a shipping basis.

shipping basis.

The region is one of remarkable mineralization. Adjoining the Copper Acres and on a parallel ledge, the Copper Acres interest own another large group with an equally good showing as far as developed. Mr. Margetts thought so much of the country that he located two groups of claims in the vicinity—one a copper property, the other having a good showing of galena ore, carrying 30 per cent lead and 35 ounces in silver.

Early prospecting in the Copper Acres group was attended by a discovery of gold quartz to which little attention was given at the time, but which assumes new importance in the light of later developments portance in the light of later developments in nearby camps, particularly Bannock.

### **ELY STOCKS AGAIN** IN LIVELY DEMAND Yankee Con-Yer. Copper.

Bidding for the cheaper Ely stocks was again active on the open board, although few of them were brought out. Sales: Federal Ely, 1,200 shares at 10c; Bingham Central Standard, 3,050 at 35½c to 35c; Uintah Treasure Hill, 200 at 10c. Closing

fected at Special Meeting in November.

Colorado and Provo were yesterday the That the consolidation of the Ajax and

manager of the Grand Central and Victoria mines, having discovered that the ore channels of those famous producers must certainly enter Gold Chain ground. The workings of Ajax, with its well equipped 1,200-foot shaft, present ready made means of quickly gaining access to the prospective ore bodies at depth, making the consolidation one that is likely to result in the bringing in of a new important producer in a very short time.

Nearing Contact, Tunnel Opens Ore Body Which Appears Important.

Experts who have contended that no im-Experts who have contended that no important body of ore would ever be found in the southern portion of the Alta district will have to revise their opinion on that point if the showing in the tunnel that point if the showing in the tunnel of the Rainbow Mining company continues to improve as it has done in the last few days. When Manager R. J. Jarvis came down from camp yesterday the tuninel had been driven between eight and ten feet, he said, in ore that carries six per cent lead and 30 ounces in silver to the

The tunnel at the time Mr. Jarvis left had not yet encountered the contact, though it was expected that would broken into within a relatively short distance, possibly in a few feet. Indications were that a large body of ore was being entered—one which on the contact would make yet larger and richer. The Rainbow mine is on the south side of Little Cottonwood creek, just across from Tanner's flat. That section of the

from Tanner's flat. That section of the district was long tabooed by mining men, although some of the best experts in the country who have recently examined the showings in the Rainbow and neighboring properties have declared that the formation is altogether right for the finding of as good ore bodies as any in the older portion of the comp. of as good ore bodies as any in the older portion of the camp.

The Rainbow tunnel is nearly 400 feet long and has attained a depth of about 150 feet. The company has an excellent site for a lower tunnel—one which will attain a depth of about 600 feet, and with the showing which is being obtained in the present workings the management exthe present workings the management ex-pects soon to be fully justified to start work in the new bore.

CUT VEIN IN FROST SHAFT. Work of New Company at Austin

Brings Results. Austin, Oct. 28.—The Panamint vein has been cut in the Frost shaft, eighty-five feet below the tunnel level, or at considerably below the 700-foot level from the erably below the 700-foot level from the surface. This announcement tallies to within half a dozen feet of the calculations made by the engineers in charge of the work of the Austin-Manhattan Consolidated Mining company, which is expending hundreds of thousands of dollars here, in the belief that the vein system that has produced \$59,000,000 above the 600-foot level will prove equally as rich at further depth.

The latest work done on this ledge and

further depth.

The latest work done on this ledge and closest to the point where it has been reopened in the Frost shaft, was in the Kelly and Floyd lease. This was in 1882 and the ledge was broken down on the east to within 109 feet of the Frost. The entire break of the ledge was milled by the leasers and the usual shoots of high grade ruby that are common to this section swelled the profits to a handsome figure.

### SCHIRMER HERE TO LOOK AT BOSTON CON.

Frank A. Schirmer of Boston, one of the large owners of Boston Consolidated and South Utah Mines, arrived in the city yesterday upon one of his periodical visits to the Newhouse properties. He was accompanied to Bingham yesterday by General Manager Lafayette Hanchett and Mine Superintendent L. S. Cates to examine important new developments in Boston Consolidated. That Mr. Schirmer's present visit may have to do with the contemplated doubling of that company's milling facilities is believed in some quarters. Performance of the mill at Garfield has been so satisfactory that, with mine developments reaching the better grade of porphyry ore, the inducement for increasing the company's production appears attractive.

Before returning to Boston Mr. Schirm-Newhouse. duction appears attractive.

Before returning to Boston Mr. Schirmer may visit the property of the South Utah Mines company, at Newhouse, to be present at the bringing in of the remodeled mill and the reopening to productio

# KRAMER HILL IS

Glasgow & Western Mines and Mills Much Ore at Golconda.

The aggressive mining and milling of the ores from Kramer hill at Golconda is fast bringing that town back to its old standing, when the town was one of the busiest commercial and mining centers in
the state, says the Humboldt Star. The
work being done there is not mere prospecting, but progressive mining on a big
scale and reduction of the ores extracted
in the big mill at Golconda.

About thirty men are at work on the
property under the superintendency of A.
P. S. Macquestin of the Glasgow & Western Exploration company, and it was by

Opening of the tungsten mines near Oscola, Nev., is progressing with the most satisfactory results, according to O. A. Turner, chief owner of the properties, and E. L. Fletcher, his manager, who are in this city purchasing additional machinery required to facilitate development.

The new tunnel, which is being driven I. Tee below the one constructed by I. Harriott, the former owner, and which is following the enan ledge, is in a better grade of ore than any ever before opened on any of the several ledges in the group. Besides carrying a large pertage of tungstle acid, the ore carried was at 61c. Iron Blossom was fairly stored at 81.279 & 10.29. For power of the several ledges in in a better grade of tungstle acid, the ore carried was to feel the group. Besides carrying a large pertage of tungstle acid, the ore carried was at 61c. Iron Blossom was fairly stored at 62c to 70c, Columbus Consoliated was to feel tungstle acid is marketable for The ore is to be concentrated on the property into a high class product for shipment to chemical works in the east, where the tungstle acid is marketable for Total number of shares sold, 91,332; valued and high grade tool steel.

And open air compressor is being instanced by the result of the Ajax and Gold Chain Mining companies, which was forecasted by the result of the Ajax company, will be accomplished at the special meeting was charly shown that the closure of the Ajax company is the same number of shares of colon at the same number of shares of colon and to one of the Ajax company to the section of the Ajax company to P. S. Macquestin of the Glasgow & Western Exploration company, and it was by his conservative management that the property was so extensively developed for the easy handling and extraction of ore. With the aid of power drills two long tunnels were run, from different directions to penetrate the great ore zone that had been previously prospected by a shaft to a depth of about 150 feet on what was known as the Oswald-Thompson lease, and another on what is known as the Lyng-Welshons-Eggers block of ground just south of the former lease.

Satisfied that a great mine existed there the tunnels were started into the hill to tap the ore bodies at great depth, and it is from these workings that the mine is being worked at the second transfer or the started of the content of the property worked at the second transfer or the s

## DALY WEST MINE MAKES HEADWAY

Soon Be Practicable to Increase Milling, Says Manager in Report.

Daly-West Mining company's report for the quarter ending Sept. 30 shows total receipts of \$128,316.46, with total expenditures of \$152,575.32, including \$28,316.46 for drain tunnel development, but not including the dividend disbursement of \$54,000. Cash on hand June 30, 1909, was \$265,341.98; while the sum on hand Oct. 1, 1909, was \$187,083.12.

"Connection has been made from the tunnel level to the shaft and a station is being cut at the 1,900 level," says General Manager Ernest Bamberger in preeral Manager Ernest bamberger in pre-senting his report.

"A winze has been sunk from the 1,550 level, the deepest level from which stop-ing has been carried on, to a point where connection will soon be made by the crosscut from the shaft on the 1,700 level. This winze, 200 feet on the dip of the vein, and a drift 116 feet to the east and one 63 feet to the west from the bottom of the winze, have shown a good grade one 63 feet to the west from the bottom of the winze, have shown a good grade of milling ore practically all the distance.

These drifts are being advanced in ore.

"The crosscut on the tunnel level should shortly encounter the vein. Progress has been more satisfactory than during the previous quarter, though much heavy ground and frequent flows of water have retarded the advance.

"A large portion of the exploratory work on the lower levels will soon be completed, which will materially reduce the monthly expenditure.

"Should the developments continue as favorably as they have during the past quarter it will soon be practicable to increase the milling operations."

ARE BULLISH ON COPPER. Boston Brokers See Indications of Upward Turn.

Paine, Webber & Co. continue to see

things in the copper situation which indi-cate that something out of the ordinary is due on the bull side. In their letter received yesterday over the Pollock private wire they say:
"Every day shows new indications that the turn has come in copper affairs and that we may soon expect an active and that we may soon expect an active and much higher market. Amalgamated Copper was steadily accumulated all day, recovering its dividend and rallying two points, closing at \$4½, the highest for many days. In the Boston market one house bought all the Superior & Pittsburg in sight, advancing the price a point and a half. Miami and Greene Cananea were also strong. The balance of the list was quiet, but principally because the offerings were so scarce. We look for developments in the metal situation within a few days now, and believe that this will a few days now, and believe that this will be followed by a sharp advance in all the local coppers."

Orpheum Tickets Given Away by the Herald-Republican.

Somewhere in the classified columns of every issue of The Herald-Republican will be found an order for two seats at the Orpheum theatre, good for either matinee of evening performance, on date of issue.
